

AMI Meter Installation Testimonial, City of Laurinburg, NC

Metering Equipment and Services

Date: March 27, 2014

“Learned this morning that Mark with Bellwether finished installing all of the electric meters, as contracted. I would like to commend the Bellwether Staff and Harry. They coordinated and worked so well together, it can only be described as “poetry in motion”, it was Team Work in every sense of the word. I always received the changeout information in a timely matter and the information was accurate. I only requested a few photos because of customers insistence that the old meter read was wrong and each time I was able to show them a picture of the meter with the same ending read as the read on their bill. Bellwether is a very professional outfit and it was an absolute delight and honor to have them assist us in this very important project.”
