

Toshiba LED Lighting Wins Top Honor for Outdoor Product Design

Lighting & Accessories

Date: January 28, 2014

January 27, 2014 – Toshiba International Corporation's LED Lighting division announced today that the TLS-RTLM roadway luminaire has been recognized by Next Generation Luminaires Solid State Lighting (SSL) Outdoor Design Competition for ingenuity in lighting design.

The Next Generation Luminaires SSL Design Competition seeks to encourage technical innovation and recognize and promote excellence in the design of energy-efficient LED luminaires for commercial, industrial and institutional applications.

"Being recognized by Next Generation Luminaires is a great accomplishment," said Tammy Impagliazzo, Director of Marketing for Toshiba's LED Lighting Division. "The inclusion of our TLS-RTLM roadway luminaire is among several recent testaments to Toshiba's commitment to innovation in the outdoor lighting and design space, and we look forward to continued leadership within the industry."

The TLS-RTLM features a NEMA twist-lock photocell system which provides automatic dimming capabilities and reduces energy costs by automatically adjusting light output at dusk and dawn. It is designed to deliver superior optical performance compared to conventional high-intensity discharge (HID) lighting.

The 2013 Next Generation Luminaires Outdoor Competition judging event took place on Dec. 9-11 at Virginia Tech Transportation Institute. Winners will be formally announced at Strategies in Light on Feb. 26.

About Toshiba International Corporation

Toshiba International Corporation (TIC) is a Toshiba America Inc. (TAI) Group Company, a wholly owned subsidiary of Toshiba Corporation. TIC is headquartered in Houston, Texas and employs approximately 2,000 people. TIC provides application solutions to a wide range of industries including industrial, power systems, transmission and distribution systems, and lighting systems. For more information about TIC, please visit www.toshiba.com/tic.

About Toshiba International Corporation's LED Lighting Systems Division

TIC's LED Lighting Systems Division provides the North American market with a variety of high-efficiency LED products. Drawing upon Toshiba's 125-year heritage of lighting innovations in Japan and world-class electronic and semi-conductor technologies, the LED Lighting Systems Division is emerging as a leader in solid state lighting. The LED Lighting Systems Division is committed to providing lighting solutions that enhance the quality of life and meet the diverse needs of its customers. The team at Toshiba LED Lighting takes the real world approach to give an exceptional customer experience like no other, and that means backing a trusted brand and quality products with unparalleled and uncompromising service.
